

TRAINING PROGRAMME

Why?

Health & Safety is an essential part of everyday business life. The HSE (Health & Safety Executive) was set up to help devise and implement safety legislation. They now advise that organisations should be managing their own safety rather than relying solely on external consultants. With this in mind, Cambridge Safety LLP aims to help companies by offering a wide range of training courses.

Who?

Cambridge Safety was established in Peterborough in 1998 primarily to provide assistance to organisations in meeting their legal obligations with respect to health & safety. Through this work it has become apparent that, not only do organisations need competent technical assistance, but also need to give employees at all levels the skills to work safely and to manage health & safety effectively. Cambridge Safety provides a wide range of cost effective training solutions with this aim in mind.

Numerous studies have shown that a safety management system supported by competent employees can provide an organisation with significant cost savings. Avoiding accidents, reducing insurance claims and premiums plus improving morale are some of the many ways that an effective safety management system can positively affect an organisation.

How?

Our focus is on providing easily accessible development opportunities which is why the majority of our course programmes are provided on a **day-release** basis to enable delegates to fit their development needs alongside their existing work commitments. All our courses are supported by lively enthusiastic presentations, quality handouts and relevant HSE publications. Our photos and video clips are used to demonstrate examples of both good and bad practice to delegates. Our pass rates for all course programmes exceed the national averages by far, so if you have the commitment, you are in safe hands!

TRAINING PROGRAMME

Nebosh Health and Safety Diploma

This is an intensive yet informative and enjoyable course which is run over 38 days including examinations and revision days. It consists of three taught modules and one work based assignment which is based on the principles taught throughout the course. It is run on a day release basis to allow for delegates who need to manage the course around their work commitments. The programme is run over a period of one year to enable time for study and work commitments. (Start dates March and Sept each year)

Nebosh Diploma in Environmental Management

This 14 day diploma course aims to give the delegate the skills to develop and implement effective environmental management systems within their organisation.

With the continuing convergence of occupational and environmental risk assessment, there is an ever-growing need for the Environmental Diploma as a structured and guided course of study. This can lead to associate membership of IEMA

Nebosh General Certificate in Occupational Safety & Health

The highly enjoyable and informative course is run over 11 days with the two examinations on day 12. We run courses on a day-release basis to suit the needs of both delegate and employer.

The course is highly participative with tutor presentations supported by the use of practical exercises, syndicate and group work, video and feedback sessions. A comprehensive manual of handouts and supporting HSE publications are provided. (Course start dates Jan, April, September and October each year)

Nebosh Construction Certificate

The NEBOSH National Construction Certificate is aimed at Supervisors, Managers and CDM Co-ordinators within the construction industry who are required to ensure that

TRAINING PROGRAMME

activities under their control are undertaken safely. This course is run over 14 days. The qualification is also appropriate for supervisors and managers working in other industries and work functions such as facilities and estates management. The course is assessed via one examination and one assessed workplace inspection. This course is particularly important too as it is specifically quoted in the Approved Code of Practice which forms part of the Construction, Design and Management Regulations 2007.

Nebosh Certificate in Environmental Management

Environmental standards are developing rapidly in the UK with more and more regulations covering issues such as waste management, energy efficiency and pollution control. Managing environmental issues is not only a legal necessity but can result in definite improvements and cost savings if implemented successfully. This course is designed for safety practitioners and other managers who have involvement in environmental issues within the organisation. This is an NVQ level 3 qualification covering 9 different areas of environmental practice. The course assessment includes a two hour examination set by NEBOSH and a workplace environmental audit and report.

IOSH Managing Safely

This course is accredited by the Institution of Occupational Safety and Health (IOSH). The course aims to help supervisors, line managers and senior managers gain a basic knowledge of safety legislation and practice.

The successful delegates receive an official certificate from IOSH. This course is available on a day-release basis over 4 days.

IOSH Directing Safely

This 1 day course is aimed at people with strategic responsibilities for health & safety and senior managers.

IOSH Managing With Environmental Responsibilities

This course is designed for those who may need to manage environmental issues in their organisation or wish to extend their knowledge in this growing area. The programme includes organisational policy, legislation and good practice. The course aims to ensure that people in positions of responsibility appreciate the environmental issues relating to their working practices and processes and develop an understanding of how to manage them.

Health & Safety Update Sessions

These one day programmes are generally run every six months to provide an opportunity for people to top up their knowledge and keep ahead of the many developments which occur in the field of health and safety.

Summary

All our courses are highly interactive with tutor presentations supported by the use of practical exercises and a comprehensive manual of handouts and HSE publications where appropriate.

We are based in a superb purpose built training facility in Hampton, Peterborough. Wireless network and on-line PC facilities allow delegates to carry out research or catch up on emails.

HEALTH AND SAFETY CONSULTANCY SERVICES

Whatever your health and safety requirements, call us for a friendly, without obligation discussion.

INFORMATION
