

HEALTH AND SAFETY

Why?

Health & Safety is an essential part of everyday business life. The HSE (Health & Safety Executive) was set up to help devise and implement safety legislation. Cambridge Safety LLP helps companies by offering a wide range of training courses and consultancy services to assist them in meeting their legal duties. Every company must have access to competent health and safety advice, it's a requirement of the Management of Health and Safety at Work Regulations 1999.

Who?

Cambridge Safety was established in Peterborough in 1998 primarily to provide assistance to organisations in meeting their legal obligations with respect to health & safety. Through this work it has become apparent that, not only do organisations need competent technical assistance, but also need to give employees at all levels the skills to work safely and to manage health & safety effectively. Cambridge Safety provides a wide range of cost effective training solutions with this aim in mind.

We are able to provide both small and large businesses with the support they need to bring their current systems up to the required standards and provide the written material to support any informal standards already in place.

Our aim is to work with you and identify any specific areas of weakness and then actually put procedures or systems in place to upgrade these to meet minimum requirements. This will ensure the company is meeting not only its legal obligations but is also taking its responsibilities to its employees, customers, contractors and others seriously to avoid accidents and injury.

All packages include the use of our company name and H&S practitioner details as your company's competent advisor for a period of one year. This is subject to us, at the beginning of the contract, reviewing your paperwork and records to ensure they meet the minimum standards and either providing a new package of information or updating the current one.
