INTRODUCTION

WHO?

Cambridge Safety was established in Peterborough in 1998 primarily to provide assistance to organisations in meeting their legal obligations with respect to health, safety and environmental issues. Through this work it has become apparent that, not only do organisations need competent technical assistance, but also need to give employees at all levels the skills to work safely and to manage health & safety effectively. Cambridge Safety provides a wide range of cost effective training solutions with this aim in mind.

We appreciate that work and personal circumstances do not always allow those wishing to develop new skills to attend a fully tutored course. As such we have developed a range of distance learning and E-Learning options to enable directed study towards a range of Neboosh qualifications. Study can be started at any time, with a variety of examination dates available each year. With downloadable additional resources and a series of extensive podcast audio files.

If you have studied with another centre then we are able to offer a range of exam only or exam plus revision packages to support you in achieving your qualification.

To be able to sit the Neboosh health and safety diploma or environmental diploma examinations you must have been studying with an approved centre such as ourselves or another Neboosh approved centre, whether by taught course or distance learning.

To enter for any Neboosh exam or assessment, exam registration must be made at least 9 weeks before the examination date. Details of the exam dates and registration dates are provided once you have booked on a course, or if you have a specific exam date in mind please contact us to confirm when you will need to be registered.

Optional Revision and Exam Preparation Sessions

Revision tutorials are run prior to most examinations, these aim to cover a range of issues from the relevant syllabus, focus on examination techniques and give candidates and opportunity to do a variety of practice examination type questions. It also enables delegates to clarify any points from the syllabus which they are unsure about. Time permitting a mock assessment or examination is also used to prepare candidates for their formal examinations.

We also provide a service to external delegates who would like feedback on practice exam type questions.

.

QUALIFICATION OVERVIEW

Nebosh National General Certificate in Occupational Safety and Health

The health and safety certificate is designed to help non safety specialists meet their health and safety obligations - many safety practitioners start with this course before progressing to the more intensive and detailed National Diploma. The qualification is divided into three parts; NGC1 covering safety management, GC2 dealing with workplace hazards and GC3 which is a work based inspection. All three elements must be successfully completed to gain the full qualification.

NGC1 & GC2 - Each unit has a two hour examination
GC3 - work based practical assessment

Candidates are required to find a suitable venue for their GC3 assessment, which must be completed within 14 days of their examinations. Guidance on the format of the inspection and report are provided as part of our package.

Exam dates at our centre are available in the first full week of March, June, September and December of each year. There is also usually an additional date in October available. Exam entry dates are normally 10 weeks prior to the exam date. Revision sessions are normally held in the same week as the exams.

Nebosh Construction Certificate

This qualification is aimed at Supervisors, Managers and all those involved in the construction industry who are required to ensure that activities under their control are undertaken safely. It is also likely to prove useful for those concerned with the management of buildings who may need to ensure that contractors are working safely. In addition this qualification is also appropriate for supervisors and managers working in other industries and work functions such as facilities and estates management.

Course assessments

NGC1 Safety Management — One two hour examination
NCC1 Managing Construction Hazards - One two hour examination
NCC2 Work based practical inspection and report

The assessment for this qualification includes the NGC1 Management of safety, NCC1 construction hazards and controls examination and NCC2 - a work based inspection. Those who have achieved the Nebosh General Certificate in H&S in the last five years are exempt from the NGC1 examination.

Nebosh Fire Safety and Risk Management Certificate

The NEBOSH National Certificate in Fire Safety and Risk Management is designed for people who have fire safety responsibilities at work. It provides the knowledge and understanding, when combined with relevant experience, to carry out an effective fire risk assessment, as well as embed good practice in the workplace. It comprises of the NGC1 (Management of H&S), FC1 Fire Safety and FC2 a work based fire assessment project which must be completed in the student's workplace. Those who have completed the NGC1 as part of the General certificate or Diploma A in the last five years are exempt from the H&S management section of this qualification.

Exam dates

Certificate exams at our centre in Peterborough are available in March, June, September and December each year.

H&S DIPLOMA

DNI WORKBASED RESEARCH PROJECT

The DNI is a significant piece of work to demonstrate your work as a H&S practitioner, ideally it should be completed as you study for your diploma but it can be completed at the end if required. It can only be submitted when you have taken all three examinations. The report **must** contain evidence of research & reading beyond your course notes.

Benefits of new assignment format

- ✦ Application of vocational skills
 - ✦ Includes activities H&S practitioner expected to undertake
 - ✦ Should be useful for the employer
 - ✦ Reflective learning – if you did something how well did it go?
- In-depth study with practical application and use of research material

The report may be up to 12,000 words but there is no maximum word count apart from the executive summary which must be on just one sheet of A4 paper. Nebosh suggest 8,000 words but past experience shows this may not be enough to enable all key issues to be covered in sufficient depth. However it is important that the report is not excessively wordy and therefore does not focus on the specific issues required.

As there is no word count limit you may place any material which you have actually completed in to the report, i.e. sample risk assessment forms, questionnaires etc. You should put any non original material that you have referred to in the appendix, i.e. copy of an extract of a company procedure. However only put into the appendix information that you actually refer to in the report and that which adds to the understanding of the report. Full copies of paperwork such as company H&S policies or HSE guidance notes are not required.

There are four submission dates each year one in February, May, August and November, check the Nebosh web site for the exact dates. Late submissions will not be accepted. You will need to register to submit your unit DNI just as you do for the exams.

NEBOSH DNI WORKSHOPS

May 14th 2019 & November 11th 2019

Free to CSP delegates if already booked full course

£100 + vat external delegates

QUALIFICATION OVERVIEW

Nebosh National Diploma in Occupational Health & Safety

The Level 6 National Diploma can form the basis of professional qualification for health and safety practitioners. Along with relevant experience successful completion can lead to Chartered Membership of IOSH (CMIOSH).

The Diploma has been designed to provide knowledge and understanding to aid the development of competency in the field of occupational safety and health. It covers a core of common knowledge which is essential to any safety professional whatever industry they work in.

The course is structured around four units:-

- Managing Health & Safety (Unit A) - One three hour examination
- Hazardous Agents in the Workplace (Unit B) - One three hour examination
- The Workplace and Work Equipment (Unit C) - One three hour examination
- Workplace Based Assignment (Unit DNI) - This can be submitted in February, May, August or November of each year

Nebosh Certificate in Environmental Management

Environmental standards are developing rapidly in the UK with more and more regulations covering issues such as waste management, energy efficiency and pollution control. Managing environmental issues is not only a legal necessity but can result in definite improvements and cost savings if implemented successfully. More and more organisations are seeing the benefits and this course is designed to provide the theory and practical skills to assist the organisation in meeting these new and changing demands. This qualification covers 9 elements concluding with a two hour examination and a work based environmental audit.

EC1 - one two hour examination

EC2 - work based environmental audit and report

This qualification is assessed by one two hour examination and a workplace environmental audit. Examinations are available in March, June, September and December of each year.

Nebosh Diploma in Environmental Management

This is one of the few professional courses available in environmental management, it is aimed primarily at safety practitioners, who either have responsibility for environmental management or those whose role interlinks with that of the environmental manager. Holders of this qualification may use the designatory letters EnvDipNEBOSH after their name. In addition holders of the Environmental Diploma are eligible for Associate Membership of the Institute of Environmental Management and Assessment (IEMA).

Course Assessments

ED1 - three hour examination

ED2 - work based environmental audit.
