
TRAINING PROGRAMMES

Why?

Health & Safety is an essential part of everyday business life. The HSE (Health & Safety Executive) was set up to help devise and implement safety legislation. They now advise that organisations should be managing their own safety rather than relying solely on external consultants. With this in mind, Cambridge Safety LLP aims to help companies by offering a wide range of training courses.

Who?

Cambridge Safety was established in Peterborough in 1998 primarily to provide assistance to organisations in meeting their legal obligations with respect to health & safety. Through this work it has become apparent that, not only do organisations need competent technical assistance, but also need to give employees at all levels the skills to work safely and to manage health & safety effectively. Cambridge Safety provides a wide range of cost effective training solutions with this aim in mind.

Numerous studies have shown that a H&S management system supported by competent employees can provide an organisation with significant cost savings. Avoiding accidents, reducing insurance claims and premiums plus improving morale are some of the many ways that an effective safety management system can positively affect an organisation.

How?

Our focus is on providing easily accessible development opportunities which is why the majority of our course programmes are provided on a **day-release** basis to enable delegates to fit their development needs alongside their existing work commitments. All our courses are supported by lively enthusiastic presentations, quality handouts and relevant HSE publications. Our photos and video clips are used to demonstrate examples of both good and bad practice to delegates. Our pass rates for all course programmes exceed the national averages by far, so if you have the commitment, you are in safe hands!

TRAINING PROGRAMMES

We offer as both classroom courses and distance learning/ e-learning options. We are a Gold standard learning provider in recognition of our support to students throughout their learning journey.

Nebosh Health and Safety Diploma

This is an intensive yet informative and enjoyable course which is run over 38 days including examinations and revision days. It consists of three taught modules and one work based assignment which is based on the principles taught throughout the course. It is run on a day release basis to allow for delegates who need to manage the course around their work commitments. The programme is run over a period of one year to enable time for study and work commitments. With start dates in February and September each year, leading to examinations in January or July.

Nebosh National Diploma in Environmental Management

This diploma level course aims to give the delegate the skills to develop and implement effective environmental management systems within their organisation. With the continuing convergence of occupational and environmental risk assessment, there is an ever-growing need for the Environmental Diploma as a structured and guided course of study. This qualification is available as an open learning package where individuals study the material at home at their own pace.

Nebosh General Certificate in Occupational Safety & Health

The highly enjoyable and informative course is run over 11 days, including one exam and one work based risk assessment. The course is highly participative with tutor presentations supported by the use of practical exercises, syndicate and group work, video and feedback sessions. A comprehensive manual of handouts and supporting HSE publications are provided. (Classroom course start dates Jan, April, September and October each year.)

TRAINING PROGRAMME S

Nebosh H&S Management for Construction

This new syllabus and course introduced in 2020 is aimed at Supervisors, Managers and all those with responsibilities under the Construction Design and Management Regulations within the construction industry who are required to ensure that activities under their control are undertaken safely. This course is run over 10 days covering the management of construction projects and specific construction related hazards and risks. The course is assessed via one exams and a construction case study.

Nebosh Fire Certificate

The NEBOSH National Certificate in Fire Safety and Risk Management is designed for people who have fire safety responsibilities at work. It provides the knowledge and understanding, when combined with relevant experience, to carry out an effective fire risk assessment, as well as embed good practice in the workplace. The qualification consists of the NGC1 Health and Safety Management, FC1 Fire hazards and risk assessment and FC2 practical assignment. Those who have passed their NGC1 within 5 years only need to pass the FC1 and FC2.

Nebosh Certificate in Environmental Management

Environmental standards are developing rapidly in the UK with more and more regulations covering issues such as waste management, energy efficiency and pollution control. Managing environmental issues is not only a legal necessity but can result in definite improvements and cost savings if implemented successfully. This course is designed for all those who have involvement in environmental issues within the organisation. This is an NVQ level 3 qualification covering 9 different areas of environmental practice. The course assessment includes a two hour examination set by NEBOSH and a workplace environmental audit and report.

Nebosh Accident and Incident Investigation

A one day introduction to incident investigation techniques.

Nebosh HSE Certificate in Process Safety Management

This is a recent addition to Nebosh's package of specialist qualifications. Aimed at those who work in high risk process industries. It is more technical than some of the other H&S qualifications. This course concludes with a 90 minutes multiple choice examination.

NEBOSH Environmental Awareness At Work

This is a basic environmental awareness at work award, with a minimum of one day covering environmental management and a number of the key environmental issues such as Waste, Noise, Water and Air pollution

NEBOSH Health and Safety at Work

The course focus is very much on the practical application of health and safety, dealing with a wide range of common hazards, rather than dealing with specific legal requirements. The course is run over 3 days with a formal multiple choice assessment and risk assessment marked by Nebosh.

IOSH Managing Safely

This course is accredited by the Institution of Occupational Safety and Health (IOSH). The course aims to help supervisors, line managers and senior managers gain a basic knowledge of safety legislation and practice. The successful delegates receive an official certificate from IOSH. This course is available on a day-release basis over 3 days and is also available in-house.

Study options

Our taught open courses are run at our centre in Hampton, Peterborough but for those unable to commit to attending tutorials we have distance learning study options for our Certificate and Diploma courses. Nebosh certificate levels courses are available in as E-Learning packages but please bear in mind the examinations and assessments are formally set by Nebosh and have to be taken at a nominated examination centre such as our centre in Peterborough. If you have sufficient numbers of delegates we can run these programmes in-house at your site.

INFORMATION

Our tutors are all practising health & safety professionals with over 20 years experience developing, presenting and examining on a full range of health, safety and environmental training courses and qualifications.

All our course programmes can be run on an in-house basis if you have sufficient numbers of delegates to train. We can also provide course programmes designed around your specific training and work requirements

Typical bespoke courses include:-

- H&S for Managers
- Introduction to the Construction, Design & Management Regulations 2015
- COSHH & COSHH Assessments
- Introduction to Environmental Management
- Health and Safety Awareness
- Manual Handling & Manual Handling Assessor
- Risk Assessment
- Display Screen Equipment Assessor
- Environmental awareness
