# INTRODUCTION

## WHO?

Cambridge Safety was established in Peterborough in 1998 primarily to provide assistance to organisations in meeting their legal obligations with respect to health, safety and environmental issues. Through this work it has become apparent that, not only do organisations need competent technical assistance, but also need to give employees at all levels the skills to work safely and to manage health & safety effectively. Cambridge Safety provides a wide range of cost effective training solutions with this aim in mind.

We appreciate that work and personal circumstances do not always allow those wishing to develop new skills to attend a fully tutored course. As such we have developed a range of distance learning and E-Learning options to enable directed study towards a range of Neboosh qualifications. Study can be started at any time, with a variety of examination dates available each year. With downloadable additional resources and a series of extensive podcast audio files.

If you have studied with another centre then we are able to offer a range of exam only or exam plus revision packages to support you in achieving your qualification.

To be able to sit the Neboosh health and safety diploma or environmental diploma examinations you must have been studying with an approved centre such as ourselves or another Neboosh approved centre, whether by taught course or distance learning.

To enter for any Neboosh exam or assessment, exam registration must be made at least 9 weeks before the examination date. Details of the exam dates and registration dates are provided once you have booked on a course, or if you have a specific exam date in mind please contact us to confirm when you will need to be registered.

### **Optional Revision and Exam Preparation Sessions**

Revision tutorials are run prior to most examinations, these aim to cover a range of issues from the relevant syllabus, focus on examination techniques and give candidates and opportunity to do a variety of practice examination type questions. It also enables delegates to clarify any points from the syllabus which they are unsure about. Time permitting a mock assessment or examination is also used to prepare candidates for their formal examinations.

We also provide a service to external delegates who would like feedback on practice exam type questions.

## QUALIFICATION OVERVIEW

### **Nebosh National General Certificate in Occupational Safety and Health**

The General Certificate is designed to help non health & safety specialists meet their health and safety obligations - many safety practitioners start with this course before progressing to the more intensive and detailed National Diploma. This qualification consists of eleven course elements, four covering the management of health and safety and seven covering specific workplace hazards and risks. The four management elements are assessed by one new style open book examination and the more practical hazards and risks are assessed via a comprehensive workplace risk assessment report. The NG1 is the name given to the management of health and safety and the NG2 is the name given to the workplace hazards section of this qualification. Both exam and risk assessment have to be passed in a five year period to achieve the qualification. We recommend allowing approximately 100 hours of study time. This is a brand new syllabus with assessments and examinations at Cambridge Safety available from March 2020 onwards.

National examination dates are available every three months in March, June, September and December but as an approved Learner Provider we at Cambridge Safety we may have other dates available, please contact us if you need further details of examination sittings which are available. Please note the new open book exam has been launched in response to the COVID19 situation, details and dates will be provided when they become available.

If you have taken the 2014 version of the General Certificate and have already taken one or more assessments - contact us as you will still be able to take the remaining exams in 2020 and 2021. If you still need to take the NGC1—this will now be in the form of an open book examination which you can take in a safe and secure location of your choice.

### **Nebosh Construction Certificate**

This qualification is aimed at Supervisors, Managers and all those involved in the construction industry who are required to ensure that activities under their control are undertaken safely. It is also likely to prove useful for those concerned with the management of buildings who may need to ensure that contractors are working safely.

#### Course assessments

NGC1 H&S Management — open book examination

NCC1 Managing Construction Hazards - One two hour examination

NCC2 Work based practical inspection and report

Those who have achieved the Nebosh General Certificate (2014 syllabus only) in H&S in the last five years are exempt from the NGC1 examination. (Course assessments subject to variation due to COVID19 situation)

### **Nebosh Fire Safety and Risk Management Certificate**

The NEBOSH National Certificate in Fire Safety and Risk Management is designed for people who have fire safety responsibilities at work. It provides the knowledge and understanding, when combined with relevant experience, to carry out an effective fire risk assessment, as well as embed good practice in the workplace. It comprises of the NGC1 (Management of H&S), FC1 Fire Safety and FC2 a work based fire assessment project which must be completed in the student's workplace. Those who have completed the NGC1 as part of the General Certificate (2014 syllabus only) or Diploma A in the last five years are exempt from the H&S management section of this qualification.

### **Exam dates**

Certificate exams at our centre in Peterborough are available in March, June, September and December each year subject to COVID19 restrictions.

# H&S DIPLOMA

## **Nebosh National Diploma in Occupational Health & Safety**

The Level 6 National Diploma can form the basis of professional qualification for health and safety practitioners. Along with relevant experience successful completion can lead to Chartered Membership of IOSH (CMIOSH).

The Diploma has been designed to provide knowledge and understanding to aid the development of competency in the field of occupational safety and health. It covers a core of common knowledge which is essential to any safety professional whatever industry they work in.

The course is structured around four units:-

- Managing Health & Safety (Unit A) - One three hour examination
- Hazardous Agents in the Workplace (Unit B) - One three hour examination
- The Workplace and Work Equipment (Unit C) - One three hour examination
- Workplace Based Assignment (Unit DNI) - This can be submitted in February, May, August or November of each year

### **DNI assignment**

The DNI is a significant piece of work to demonstrate your work as a H&S practitioner, it is submitted when you have taken all three diploma examinations. The report **must** contain evidence of research & reading beyond your course notes.

Benefits of new assignment format

- ✦ Application of vocational skills
- ✦ Includes activities H&S practitioner expected to undertake
- ✦ Should be useful for the employer
- ✦ Reflective learning – if you did something how well did it go?

Contact us for  
details of our DNI  
workshops

In-depth study with practical application and use of research material

The report may be up to 12,000 words but there is no maximum word count apart from the executive summary which must be on just one sheet of A4 paper. Nebosh suggest 8,000 words but past experience shows this may not be enough to enable all key issues to be covered in sufficient depth. However it is important that the report is not excessively wordy and therefore does not focus on the specific issues required.

As there is no word count limit you may place any material which you have actually completed in to the report, i.e. sample risk assessment forms, questionnaires etc. You should put any non original material that you have referred to in the appendix, i.e. copy of an extract of a company procedure. However only put into the appendix information that you actually refer to in the report and that which adds to the understanding of the report. Full copies of paperwork such as company H&S policies or HSE guidance notes are not required.

There are four submission dates each year one in February, May, August and November, check the Nebosh web site for the exact dates. Late submissions will not be accepted. You will need to register to submit your unit DNI just as you do for the exams.

## QUALIFICATION OVERVIEW

### **Nebosh Certificate in Environmental Management**

Environmental standards are developing rapidly in the UK with more and more regulations covering issues such as waste management, energy efficiency and pollution control. Managing environmental issues is not only a legal necessity but can result in definite improvements and cost savings if implemented successfully. More and more organisations are seeing the benefits and this course is designed to provide the theory and practical skills to assist the organisation in meeting these new and changing demands. This qualification covers 9 elements concluding with a two hour examination and a work based environmental audit.

EC1 - one two hour examination

EC2 - work based environmental audit and report

This qualification is assessed by one two hour examination and a workplace environmental audit. Examinations are available in March, June, September and December of each year.

### **Nebosh Diploma in Environmental Management**

This is one of the few professional courses available in environmental management, it is aimed primarily at safety practitioners, who either have responsibility for environmental management or those whose role interlinks with that of the environmental manager. Holders of this qualification may use the designatory letters EnvDipNEBOSH after their name. In addition holders of the Environmental Diploma are eligible for Associate Membership of the Institute of Environmental Management and Assessment (IEMA).

Course Assessments

ED1 - three hour examination

NDEM2 - work based environmental audit.

ED1 exams are available in July and January of each year.

NDEM2 can be submitted four times a year, February, May, August and November
