## TRAINING PROGRAMMES

### Why?

Health & Safety is an essential part of everyday business life. The HSE (Health & Safety Executive) was set up to help devise and implement safety legislation. They now advise that organisations should be managing their own safety rather than relying solely on external consultants. With this in mind, Cambridge Safety LLP aims to help companies by offering a wide range of training courses. And qualifications for employees and those with specific roles and responsibilities.

### Who?

Cambridge Safety was established in Peterborough in 1998 primarily to provide assistance to organisations in meeting their legal obligations with respect to health & safety. Through this work it has become apparent that, not only do organisations need competent technical assistance, but also need to give employees at all levels the skills to work safely and to manage health & safety effectively. Cambridge Safety provides a wide range of cost effective training solutions with this aim in mind.

Numerous studies have shown that a H&S management system supported by competent employees can provide an organisation with significant cost savings. Avoiding accidents, reducing insurance claims and premiums plus improving morale are some of the many ways that an effective safety management system can positively affect an organisation.

### How?

Our focus is on providing easily accessible development opportunities which is why the majority of our course programmes are provided on a **day-release** basis to enable delegates to fit their development needs alongside their existing work commitments. All our courses are supported by lively enthusiastic presentations, quality handouts, podcasts and Youtube videos. Our photos and video clips are used to demonstrate examples of both good and bad practice to delegates. Our pass rates for all course programmes exceed the national averages by far, so if you have the commitment, you are in safe hands!

---

## TRAINING PROGRAMMES

We are now offering as both classroom courses and distance learning/ e-learning options. We are a Gold standard learning provider in recognition of our support to students throughout their learning journey.

### Nebosh Diploma for Health and Safety Professionals—Launched 2021

This is an intensive yet informative and enjoyable course. The qualification consists of three studied units; ND1 on H&S law and management, ND2 on health issues and the ND3 on safety related issues. There are three new style case study assessments to be completed once students have studied each unit. The training sessions are run on a day release basis to allow for delegates who need to manage the course around their work commitments. The programme is run over a period of one year to enable time for study and work commitments. With start dates in February and September, December each year. Available as a full taught course or via distance learning with extensive podcasts and video presentations available all day everyday to allow delegates to fit their study around other commitments.

### Nebosh National Diploma in Environmental Management

This diploma level course aims to give the delegate the skills to develop and implement effective environmental management systems within their organisation. With the continuing convergence of occupational and environmental risk assessment, there is an ever-growing need for the Environmental Diploma as a structured and guided course of study. This qualification is available as an open learning package where individuals study the material at home at their own pace, with handouts, online resources, podcasts and videos to support study.

### Nebosh General Certificate in Occupational Safety & Health

The general certificate remains the most highly regarded H&S qualification in the UK. This highly enjoyable and

---

## TRAINING PROGRAMMES

informative course is run over 10 days, including one exam and one work based risk assessment. The course is highly participative with tutor presentations supported by the use of practical exercises, syndicate and group work, video and feedback sessions. A comprehensive manual of handouts and online resources mean delegates are not required to buy any other materials. (Classroom course start dates Jan, April, September and October each year.)

### Nebosh H&S Management for Construction—launched June 2021

This course is aimed at Supervisors, Managers and all those with responsibilities under the Construction Design and Management Regulations and those involved in facilities and building management. This taught course is run over 10 days covering the management of construction projects and specific construction related hazards and risks. The course is assessed via one in depth open book online exam.

### Nebosh Fire Safety Certificate Launched 2021

The NEBOSH Fire Safety Certificate is designed for people who have fire safety responsibilities at work. It provides the knowledge and understanding, when combined with relevant experience, to carry out an effective fire risk assessment, as well as embed good practice in the workplace. The qualification consists of two units the FSC1 and FSC2, The FSC1 covers a wide range of fire hazards and technical controls and is assessed via a case study based open book exam. The FSC2 fire risk assessment must be completed in the delegate's chosen workplace.

### Nebosh Environmental Management Certificate—Launched September 2021

Environmental standards are developing rapidly in the UK with more and more regulations covering issues such as waste management, energy efficiency and pollution control. Managing environmental issues is not only a legal necessity but can result in definite improvements and cost savings if implemented successfully. This course is designed for all those who have involvement in environmental issues within the organisation. The course covers 9 different areas of environmental practice and is assessed via a case study based open book exam and an aspect and impact assessment.

## Nebosh HSE Certificate in Process Safety Management

This specialist qualification is aimed at those who work in high risk process industries and is more technical than some of the other H&S qualifications.

### NEBOSH Environmental Awareness At Work

This is a basic environmental awareness at work award, with a minimum of one day covering environmental management and a number of the key environmental issues such as Waste, Noise, Water and Air pollution.

### NEBOSH Health and Safety at Work

The course focus is very much on the practical application of health and safety, dealing with a wide range of common hazards, rather than dealing with specific legal requirements. The course is run over 3 days with a formal multiple choice assessment and risk assessment marked by Nebosh.

### Nebosh Accident and Incident Investigation

A one day introduction to incident investigation techniques designed for anyone tasked with investigating accidents or near misses in the workplace.

### Nebosh Risk Assessment at Work

The completion of suitable and sufficient risk assessments is one of the items at the top of most H&S practitioners to do list. This one day course developed in conjunction with the HSE leads delegates through what is expected from an assessment and the range of factors to be considered.

### IOSH Managing Safely®

This course is approved by the Institution of Occupational Safety and Health (IOSH). The course aims to help supervisors, line managers and senior managers gain a basic knowledge of H&S legislation and practice. The successful delegates receive an official certificate from IOSH. This course is available on a day-release basis over 3 days and is also available as an in-house.

## INFORMATION

Our tutors are all practising health & safety professionals with over 25 years experience developing, presenting and examining on a full range of health, safety and environmental training courses and qualifications.

### Study options

Our taught open courses are run at our centre in Hampton, Peterborough but for those unable to commit to attending tutorials we have distance learning study options for our Certificate and Diploma courses.

Nebosh certificate levels courses are available in as E-Learning packages. To undertake any Nebosh assessment you must be undertaking a programme of study with an accredited learning partner such as Cambridge Safety.

If your organisation has sufficient numbers of delegates we can run these programmes in-house at your site.
